

ETHERMA^o

INGENIOUS HEATING

THE FUTURE OF HEATING
IS ALL ELECTRIC.

DESIGN.

Our heating is a true masterpiece.

Apart from efficiency and functionality, we attach special importance to an attractive design when we manufacture our products. Our heating systems match the overall picture of the living spaces, buildings and open spaces perfectly, they are invisible, or they can be integrated into the architecture as design elements. With our LAVA®DYL 2.0 infrared heating, for example, you can create a unique scene - warmth and memories, all in one. The cosiness in your living space is the focus of our work. Architectural limitations are eliminated thanks to the individual design options, custom-made production and diverse areas of application of our products.

INNOVATION.

We've been thinking ahead for more than 40 years.

Peter Reiter, the company founder, has always lived up to his name. He was a real pioneer in the field of electric heating systems. Numerous patents are the result of his work. The first European thin-bed heating mat, for instance, was produced by our company. His son and successor, Thomas Reiter, is also working constantly on the advancement of our products and is actively committed to promoting the acceptance of electric heating systems. ETHERMA was therefore also a co-founder of IG Infrarot. The innovative capacity in the fields of underfloor and infrared heating systems has characterised our company to date. ETHERMA creates series solutions from customer-specific products.

“If you want to make a difference in the future, you have to start today.”

Mag. Thomas Reiter

QUALITY.

Regional production for international standards.

For more than 40 years, we have represented the highest standard at fair prices. In order to meet our own demands and your requirements every day, we develop and manufacture our ETHERMA products with top-quality materials in Austria – our home country. In the two production facilities in Salzburg, our products are manufactured in compliance with the highest, international standard, subjected to the quality inspection by our experts and prepared with a lot of attention and care for the transport to your home.

SERVICE.

As a customer, we consider you as part of our family.

We assist you from the free-of-charge consultation and planning to the installation of your new heating system. During this time, we do not only provide you with the advice of our specialist dealers, but we'll also be happy to be at your side personally and provide you with direct support. Our staff members with their long-standing experience of professional training will take their time to solve your problems. Do you have any questions about electric heating systems? We have the answer. Do not hesitate to contact us. With us, perfect service does not end when we sell a product to you. With ETHERMA, you'll gain a reliable, loyal partner.

UNDERFLOOR HEATING

- + The optimal mat for every floor (tiles, parquet, screed, etc.)
- + Also available as a complete set with controller & accessories
- + Reacts much faster than hot water-powered underfloor heating systems

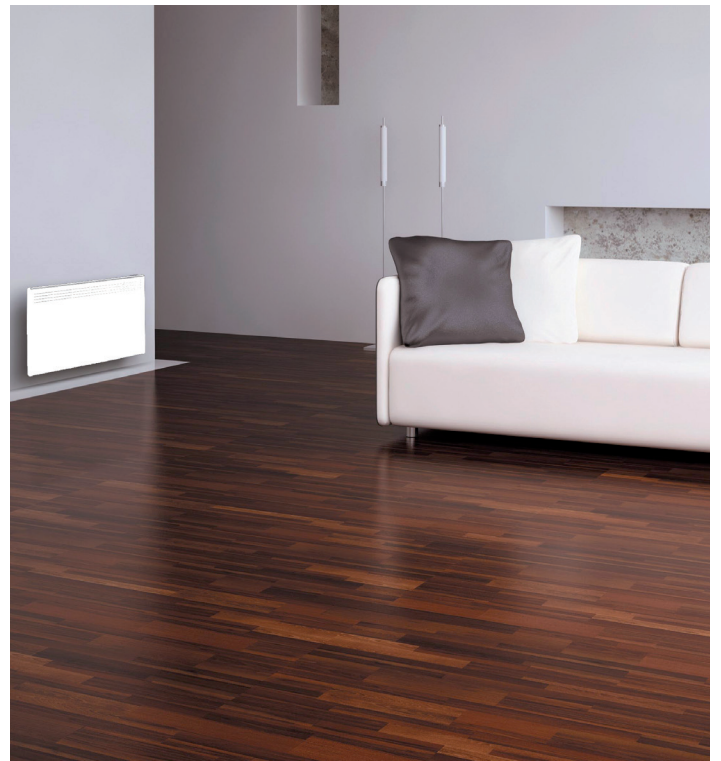

WALL HEATING

- + A harmonious interior scene thanks to heating systems integrated into the wall
- + Pleasant infrared radiant heat
- + Prevents damp walls & mould growth

INFRARED HEATING & RADIATORS

- + Very powerful front-facing heat radiation
- + Wide range of outputs
- + For walls, ceilings & integral installation
- + Wide range of control options
- + "Made in Austria" quality

DIRECT HEATING

- + Fast front-facing heat release
- + Lower purchase costs
- + No carbon deposits or wall discolouration
- + Perfect as supplementary heating

OPEN-AIR HEATING

- + Project-focused planning and production
- + Fast, automated heating response
- + No danger from black ice or snow
- + No damage from aggressive salt
- + Operating cost savings

FROST PROTECTION

- + Project-focused planning and production
- + Fast, automated heating response
- + No frost and ice damage
- + Protects from icicles and static problems on rooftops

CONTROL TECHNOLOGY

- + Precise control minimises operating costs
- + Thermostats are very easy to operate
- + Fully automated controls for frost protection solutions
- + Thermostats are LOT20 eco-design-ready

WARM WATER

- + Simple replacement of old devices
- + Decentralized hot water preparation via a small storage tank or instantaneous water heater
- + Central water heating by means of a heat pump for the household

ETHERMA CUSTOM-MADE

Individual solutions are our tradition.

Individuality defines our lives – so why should our heating systems be any different? That is why ETHERMA is one of the few manufacturers to offer customised heating solutions in the following areas:

- + Underfloor heating for technically perfect, simple and rapid installation, even in unusual architectural settings
- + Infrared heating solutions with individual style
- + Individually planned and manufactured open-air and roof area heating
- + Roof gutter heating manufactured in plant
