How does the LAVA Desk work?

The LAVA Desk Zone is an incredibly efficient heater designed to warm you directly and not the whole room.

- ❑ Our bodies naturally absorb and emit far infrared waves which are **completely natural, 100% safe and good for our well-being.**
- ❑ **It works on the principle of the sun,** producing gentle, long-wave infrared that heats people and solid objects upon contact, without heating the air.
- ❑ If you enjoy the warmth of the sun, you will love the comfort provided by the LAVA Desk Zone.
- ❑ This personal low energy infrared heater **costs just 3p/hr** on its maximum setting, compared to 44p per hour for a 2kW fan heater.
- ❑ It can be **installed on or under a desk, or both** to provide precise targeted warmth to your body.
- ❑ The LAVA Desk Zone is **fully controllable** with a **timer ensuring it won't be left on accidentally.**

The ultimate infrared desk heater

Applications:

Wherever supplementary and highly efficient heating is needed:

- Open-plan offices
- Reception desks
- Home office
- Isolated desks within large buildings
- Fits to standard or height adjustable desks

LAVA DESK ZONE includes:

- LAVA DESK TOP:** Free-standing on the desk
- LAVA DESK SUB:** Under the desk or free-standing on the floor

"The LAVA Desk is nice and toasty. I turn it off each day I use it, but it's nice to know it's not a H&S issue if I were to forget. Nice and easy and works well..." Bryony Flint, Biffa Waste Services

Infrared desk heater for individual heat zones

- ❑ Uniform heat radiation on the upper body and legs
- ❑ Individually adjustable for maximum comfort
- ❑ Maintains comfort with a lower room temperature leading to energy savings
- ❑ Accommodates varying thermal comfort needs of employees
- ❑ Low energy consumption results in reduced heating costs
- ❑ You only pay to heat occupied desks

Modern stylish product design

- ❑ Anodized aluminium frame
- ❑ Front and back panels made of Glass Reinforced Polymer (GRP) available in white or black finish
- ❑ Equipped with two temperature safety limiters
- ❑ Insulated rear enhances infrared emission from the front surface

LAVA Top

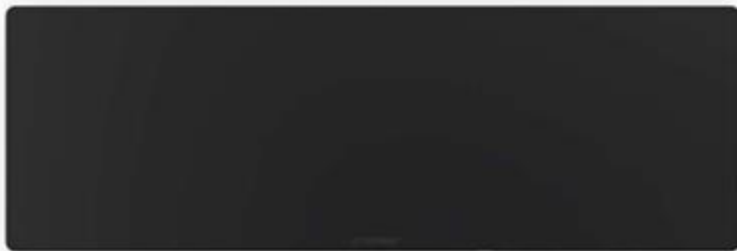

- ❑ Includes an aluminium stand
- ❑ Features an integrated timer, operated via touch sensor

LAVA Sub

- ❑ Comes with two mounting brackets for flexible installation options
- ❑ Control integrated into the connection cable, with timer and power control

LAVA Top touch sensor

Technical data

LAVA Desk Top
